APRIL 8, 1971

Resolution on salary negotiations

At the meeting of April 2, 1971, the Board of Governors of The University of Alberta made three resolutions on salary negotiations for 1971-72. The resolutions, respecting procedures for negotiations concerning salaries and fringe benefits for academic staff in 1971-72, and an adjustment in merit increments for non-academic staff in 1971-72, appear below.

RESOLUTION ONE: *Whereas*, at the meeting of the Board of Governors held on April 2, 1971, the Board received recommendations from the General Faculties Council regarding procedures for negotiations concerning salaries and fringe benefits for academic staff; and *whereas* the Board desires to study the effect of these recommendations, "collective bargaining," and labor legislation on The Universities Act, and related issues; now, therefore be it *resolved* that the Board as a Committee of the Whole immediately initiate studies on the issues set out in the preamble; *resolved* that the Academic Staff Association of The University of Alberta be invited to participate in these studies; and *resolved* that this Committee of the Whole report its recommendations to the Board at the earliest possible date.

RESOLUTION TWO: *Whereas*, the Board wishes to receive the report of the Committee of the Whole referred to in the previous resolution before entertaining changes in the procedures for negotiations concerning salaries and fringe benefits for academic staff; and *whereas*, it is deemed by the Board to be in the best interests of The University of Alberta that the operating budget for 1971-72 be fixed at the earliest possible date; now, therefore, be it *resolved* that the Board accepts the final offer of the Academic Staff Association as set out in a letter dated February 22, 1971, from R. D. BERCOV to D. K. YORATH, which was received at a meeting of the two salary negotiation committees on March 1, 1971, that is:

1. That the University's contribution to the Academic Pension Plan be increased from 6 per cent to 7½ per cent, with the staff member's contribution being 4½ per cent with present benefits, or 7½ per cent with correspondingly

increased benefits, at his choice;

2. That the University contribute one-half of the premium for each member of the AASUA enrolled in an appropriate group Denticare plan to be established by the AASUA;

3. That a \$350 across-the-board salary adjustment be awarded to academic staff in 1971-72;

and that the cost of the latest adjustment, that is, \$350 per academic staff member, be charged rateably to the entire operating budget.

RESOLUTION THREE: *Resolved* that the Board approve restoration from 2 per cent to 5 per cent of merit increments for non-academic staff in 1971-72 and that the cost of this adjustment be charged rateably to the entire operating budget.

CONTRACTS AWARDED

The Board of Governors Building Committee of The University of Alberta announced on Friday, April 2, 1971, that the contract for the Fine Arts Building was awarded to Poole Construction Ltd. of Edmonton. The contract was let for \$4,040,232, a sum which includes prime cost sums for mechanical and electrical sub-contracts to be awarded at an estimated cost of more than \$1 million.

Tenders closed about five months ago at which time all bids were above the target cost for the building. Considerable redesign of the building including electrical and mechanical areas made it possible to award the contract within the projected price.

Construction has already started on the building, which will house the Departments of Art, Drama, and Music. The three-storey building located at 112 Street between 88 and 89 Avenues will contain 152,400 square feet of space. The building is expected to be completed in the fall of 1972. D. L. SINCLAIR of Sinclair, Skakun, Naito Architects is prime consultant for the building.

J. D. HENDERSON of J. D. Henderson Engineering Ltd. of Edmonton has been appointed prime consultant for the detailed

design of Phase 4A of The University of Alberta services tunnel. The appointment of Mr. Henderson was approved Friday, April 2 by the Board of Governors.

Section 4A of the services tunnel will provide services to the west side of the campus. Completion of the tunnel is required before the construction of the Mechanical Engineering Building can be completed.

EXCELLENCE HAS NO NATIONALITY

MAX WYMAN, *President of The University of Alberta*, has made a personal statement to the "Moir Commission," the *Committee of Inquiry into non-Canadian influence in Alberta in post-secondary education*. The document, dated March 25, 1971, appears below.

Let me begin by making it clear to members of the Committee that I appear before you as one person, not as a representative of The University of Alberta. Although I am aware that other people and other groups from The University of Alberta will present ideas to you, no consensus of opinion has been sought, and there will be no opinion given by anyone or any group which might be interpreted as the official opinion of The University of Alberta.

It is also important for me to say that I am aware of the unemployment situation in Canada, and that the possibility of high unemployment at all levels is of major concern to me. The University of Alberta employs several thousands of people, both with and without university degrees. It therefore goes without saying that our University must adopt employment procedures which will help to alleviate the high incidence of unemployment among Canadian citizens, and among those to whom our government has granted the right to live and work in Canada.

However, the purpose of your inquiry is not economic in nature, and I mention employment procedures for the sole purpose of saying that universities are aware that their situation in the 1970's will be far different from what it was in the 1960's.

The question of "who should teach at The University of Alberta" is not new. Let me quote from the Minutes of a meeting of a governing body of this University:

"Dr. Jenkins expressed his disapproval of the idea of appointing all the professors and

assistants outside of the province. He was strongly in favor of utilizing the material available in the province and he felt sure that many men now engaged in educational work were eminently qualified to undertake the higher branches of learning and he felt an injustice would be done the whole of the teaching profession of the province if only outsiders were appointed."

The sentiment was expressed at the first meeting of the Senate of The University of Alberta on March 30, 1908. This was before a single member of the staff, other than the President, had been appointed to The University of Alberta. Fortunately the matter was not taken further. I say "fortunately" because I feel strongly that this University would not enjoy the respect it has today if Dr. Jenkins had had his way sixty-three years ago.

Since you are a Committee of Inquiry into non-Canadian Influence in Alberta Post-Secondary Education, sooner or later you will have to define what will be meant by a "non-Canadian influence," and to propose the procedures by means of which such an influence can be measured. Presumably you will have to be able to identify a good "non-Canadian influence" from one that, by some means or other, will be deemed to be bad. Your task will not be easy because in a rather restricted sense one might say that there is no real Canadian content in the science and mathematics courses taught in Canada today. Let me explain what I mean.

Education generally, and higher education particularly, is a world of ideas. If one traces

the sources of the big ideas of science and mathematics, they will not be found to be Canadian, nor, in fact, were they discovered in the United States. Up until the middle of the present century, these ideas came from Great Britain, France, Germany, Switzerland, Italy, and even smaller countries like Denmark made major contributions to the world of ideas. During the first fifty years of the present century, it was common practice for the men and women of Canada and the United States to go abroad for post-graduate education. Indeed, these people coupled with the thousands of people who were brought to this continent from abroad developed the educational systems of Canada and the United States.

Who were the people who dominated the world of scientific ideas during the first half of the twentieth century? As illustration only, there was Einstein of Germany, Fermi of Italy, Weyl of Switzerland, Dirac of England, Bohr of Denmark, Wigner and Von Neumann of Hungary, and De Broglie of France. Even if the list were complete, no Canadian and few Americans would be contained among those who contributed to the world of big ideas up till 1950. Since that time the United States and Russia have come to the fore. The ideas that led to the development of computer technology, to the exciting ideas being developed in genetics and the life sciences, to laser technology, and to transportation and communications technologies, to name but a few, should make us aware that the time has not yet come when Canada can arrogantly say that we shall lock out the world of ideas that exists beyond our borders, and go the rest of the way by ourselves.

How does one classify the study of arithmetic, dependent as it is on the Arabic number system? Is this a non-Canadian influence? How does one classify the study of geometry, dependent as it is on the ideas of Euclid and Pythagoras? Is this a non-Canadian influence? I do not envy the task that has been placed into your hands, and do not know how you will accomplish it.

It is my fear however that groups are raising the "non-Canadian influence" issue on a meaningless statistical basis, and that conclusions will be drawn, and, indeed, have already been drawn, which are not warranted by the statistics. If these issues develop into a witch-hunt in Canada, then I want no part of it. I lived through the McCarthy era, and friends of mine were made uncomfortable and unwelcome at their universities. Some were dismissed and some went to jail, not because they were Communists, but because they chose to fight for academic freedom, the right to seek truth as they saw fit and the right to teach and publish the truth as they saw it.

During the 1960's, Canada sought and brought men and women from the four corners of the world to help us solve what then seemed to be an insoluble problem: the problem of expanding enrolments with too few people qualified to teach. If, after making a major contribution to our country, such men and women are made to feel uncomfortable and unwelcome, then this will indeed be a sorry way for our country to show our gratitude.

There is no reason to believe that the search for truth will ever end at the borders of Canada. We are a young country and a small nation. There is every reason to believe that the majority of the big ideas of science, by means of which scientific knowledge is acquired, will come from outside our borders for many years to come. But Canada must pursue excellence, and it must pursue excellence wherever excellence exists. Therefore, Canadians must continue to go outside of our country for study, and leaders of excellence must be brought to Canada to teach their ideas on Canadian soil.

Although I have nothing but respect and admiration for the accomplishments of Canadian universities during recent years, we have no Harvards nor Oxfords in our midst. Banting and Best shared the Nobel Prize for their discovery of insulin about half a century ago. No other Nobel Prize in science has been awarded to a Canadian nor have we been able to attract such people to work in and for Canada.

As I said at the beginning, concern over unemployment in Canada is genuine, and universities must help our people to find interesting and rewarding work. However, we must not adopt a policy which will give a short-term gain but will turn into a long-time evil. It will be a tragedy if ever Canada posts signs, or enacts legislation, which will tell the members of the world of ideas they are not welcome here. Excellence attracts excellence, and such a policy will discourage desirable people from coming to Canada, and may, in the long run, encourage desirable Canadians to leave Canada.

BOOKS

Algebra and Trigonometry by WILLIAM J. BRUCE and EDGAR PHIBBS, both Associate Professors of Mathematics, has been published by Appleton-Century-Crofts in the Appleton-Century Mathematics Series under the editorship of RAYMOND W. BRINK. This is the second book that Dr. Bruce has had published.

A Poem As Long As The Highway, a book of poems by DOUGLAS BARBOUR, Assistant Professor of English, has been published by Quarry Press of Kingston, Ontario.

STUDENTS' UNION STAFF ASSOCIATION

An agreement signed March 22, 1971, between The University of Alberta Students' Union and The University of Alberta Students' Union Staff Association (SUSA), recognizes SUSA as the sole bargaining agent for the staff of the Students' Union. Its membership is 24 of the 26 employees of the Students' Union. Under the agreement the Students' Union agrees that items of grievance or contract which cannot be negotiated shall be placed before an arbitrator, agreed upon by both parties, whose decision will be binding. The Students' Union agrees to establish committees for all selections and appointments of staff members at supervisory and management levels; the committees to be composed equally of staff and management.

Before the agreement was signed an implementations committee consisting of five members of the management, five staff, and the President of the Students' Union laid out benefits and policies. These are now

non-revokable except with written consent of SUSA. The benefits and policies in effect are as follows: maternity provisions with pay; four weeks holiday per annum; grievance procedures with the right of arbitration; full medical program with dental provisions; life, loss of income, and disability insurance; compensation for termination and redundancy, to three and six months respectively; and a thirty-five hour work week. Other benefits are removal allowances, special training, Public Service Pension Plan, Workmen's Compensation, statutory and observed holidays, sick leave, and special leave.

Included under other terms of the agreement is a responsibility on the part of the supervisory and management staff to the members of the general staff for making decisions which will affect them in the areas of policy making and working conditions. The Students' Union recognizes the Human Rights Act and the part of the Labor Act governing labor practices and equal pay. The right of employees to have access to personnel files is also recognized.

Stone
Owl

THE HUMANITIES CENTRE IS 1 PER CENT COMPLETE

After the fifteenth of each month we watch with bated breath and muffled oar for the regular Progress Report of the Campus Development Office, from which we choose empirical tidbits for the delectation of FOLIO's readers.

The report, a tidy production on five different colors (so that one may quickly turn to the sewer reports or projects pending or what one will), tells in minute detail exactly what is happening behind the hoardings and inside the muddy trenches.

The document begins with a bar graph showing when the various projects start and when they are expected to be finished. Lately the graph has sported a collection of black boxes, dotted lines and pendings, signs of the uncertainties of capital and tenders.

After the bar graph comes the flood of details, the crisis of decision, the problems of deciphering the real meaning.

Engineering II, for example, is nil per cent complete and progressing right on schedule and will be finished by July 31 next year.

"Hoardings are being erected," we are told, "and burning commenced to install hydrant." Normally this latter would not be passed on to our readers because we don't know what it means either.

On the other hand, the Central Academic Building, to the great surprise of its occupants, is 100 per cent complete. The construction office later qualifies this rash statement by saying that it means the building is fully operational and promising that "all outstanding exterior deficiencies will be cleared up as soon as weather permits." But what of the interior deficiencies—grim, Auschwitz-inspired concrete slabs; an aberrant and malicious heating system; office and classroom walls a standard one-inch too short, just enough to give a sense of community?

The Basic Medical Sciences Building presents certain rather unique problems because it is being built in two over-lapping phases, the first six floors and the remaining three. For whatever reasons things fall behind schedule, the first phase schedule has been set ahead to November, the same completion schedule as the second. The project(s) is (are) 66 and 28 per cent complete and will cost \$6,049,648.92 and \$1,302,128.75 (no lack of precision here).

Now that spring is here, the noble bulldozer, proud denizen of a growing University, is once more churning up good Alberta mud. This spring, though, much of the churning will be for restoration of the grounds where service tunnels and new buildings had left the inevitable rubble and scars.

The Law Centre was begun scarcely more than a year ago, yet already it is 75 per cent complete and ten weeks behind schedule. The library areas of the centre are nearly finished and Law Library staff should start preparing for the trauma of moving.

About ten per cent of the 1970-71 Paving and Grounds contract remains to be completed when weather permits. Unfortunately the paving and ground seem to be torn up faster than contracts can be written.

As of March 15 (all of this information, incidentally, was gleaned from the March report) the Humanities Centre, Arts II, was 1 per cent complete, hoardings were up, the building staked out, and the pile-driving begun. The Centre is scheduled for completion in July, 1972; until then it will be the joy of construction watchers and daydreamers in the Tory Building.

The Fine Arts Building contract was awarded only last week and so it does not appear in the report. However, the beginnings of hoardings are up on 112 Street and a bulldozer has been hard at work chewing up an old X parking zone.

Alas for those who are fascinated by the muddy puzzle of utilities tunnels and sewers: the maps have been taken out of the monthly report. The maps gave a feeling that there really was a scheme behind a random scattering of pits. Most of the utilities projects, however, seem to be near completion and perhaps there is reason to hope that by autumn they will be just another memory.

The final pages of the report list all the projects in planning stages. Here there is little detail, but, if you know the projects and the people involved, much drama. Projects in the schematic first phase (such as Agriculture II or Household Economics II) are exciting and a little amorphous; at phase II the ideas from the first phase are developed in considerable detail and presented to the Board of Governors for approval to go on; phase III is the nitty-gritty of working drawings that leads to tendering and actual construction.

When one considers all the buildings and dreams hung up on these last pages for whatever reason, it is quite an accomplishment for the Humanities Centre to be even 1 per cent complete.

—J.F.R.

TECHNICAL SERVICES/REPORT

TELETYPE SERVICING

The Electronics Division of Technical Services is now able to offer routine and breakdown maintenance on teletypes. The service is available on a contract basis which provides for two routine service calls and

all emergency calls. The cost of the contract is \$100 per year.

For further information call either J. G. A. BRUGMAN at 4901 or W. H. JOPLING at 3302.

SHOT-BLAST MACHINE

A shot-blast machine, jointly purchased by five departments, is available for use in the Technical Services Machine Shop. The machine has a cabinet capacity of 48 in. x 38 in. x 30 in. It is designed to use glass beads, aluminum oxide, or steel grit. The machine can be used for cleaning scale from welding, deburring, shot peening, surface preparation for painting or other coatings, etching of glass, etc.

Further information may be obtained by calling the Machine Shop at 4901.

PEOPLE

■ KAROL KROTKI and EARLE SNIDER, Professor and Assistant Professor respectively, of the Department of Sociology, took part as representatives of the Human Resources Research Council in a provincial statistical conference organized by the Alberta Bureau of Statistics, on instructions from Premier HARRY STROM. Some eighty participants, representing all government departments and other public bodies, met in order to consider the co-ordination of data sources of socio-economic significance for the study of Alberta society.

■ J. F. BERGMANN, Associate Professor of Geography, was invited recently by The University of Lethbridge to present a public lecture on Welsh settlement in Patagonia. He also addressed the Latin-American Geography class on problems of development in the French West Indies.

■ WARREN WILDE, Assistant Professor of Elementary Education, was elected to the board of directors at the recent invitational conference of the Rocky Mountain Reading Specialists Association held at Billings, Montana. While there he also attended the Rocky Mountain Regional Conference of the International Reading Association.

■ METRO GULUTSAN, Associate Professor of Educational Psychology, attended the annual conference on teaching English as a second language at New Orleans, and a conference on bilingual education at the Ontario Institute for Studies in Education. He also visited the psychology department of McGill University which is active in research on bilingualism.

■ WILLIAM KNILL, Professor of Educational Administration, has been invited to give the opening address and serve as a workshop consultant for a professional development program for teachers of Hutterite children, sponsored by the Manitoba Teachers' Society in Winnipeg.

■ MILAN V. DIMIC, Chairman of the Department of Comparative Literature, was re-elected for a six-year period to the co-ordinating committee of the International Comparative Literature Association at its meeting in Paris. This committee is responsible for the research and publishing activities of the Association. FOLIO regrets that when this item appeared in the March 18 issue, the period for which Dr. Dimic has been re-elected was inadvertently given as six months instead of six years.

■ JUANITA CHAMBERS, Associate Professor of Educational Psychology, chaired the annual meeting of the American Orthopsychiatric Association in Washington D.C. Dr. Chambers has also been elected a director of the association.

VISITORS

■ In March, the Department of Germanic Languages, together with the Nórdjulos chapter of the Icelandic National League, was host to MR. and MRS. ANDRES BJÖRNSSON. Mr. Björnsson is Director-General of Icelandic State Radio and Television, and was touring Canada and part of the northern United States under the auspices of the Icelandic National League, Loftleider, and the Department of Icelandic Language and Literature at the University of Manitoba. While in Edmonton, Mr. Björnsson gave a public lecture on campus, and visited the Boreal Institute, the campus Radio and Television centre, station CKUA, and the Scandinavian Centre.

■ CLAIRE HUCKINS, Assistant Professor in the Department of Anatomy at McGill University, presented a seminar to the Department of Anatomy.

■ Medical Research Council visiting professor B. BELLEAU, Professor in the Department of Chemistry at the University of Ottawa, presented three lectures on drug receptor interactions and associated topics to the Faculty of Pharmacy.

NOTICES

PHILATELIC EXHIBITION

The Edmonton Chapter of the Royal Philatelic Society of Canada will be holding an exhibition, "ESCAPEX 1971," in the Dinwoodie Room of the Students' Union Building, April 16 to 18. Exhibits will include approximately 300 frames and post office displays, and there will be a stamp auction on Friday evening beginning at 7:30 p.m. A raffle will be held, for which the prize is either a \$100 Canadian Jubilee, or \$100 cash. A banquet is planned for Saturday evening at 7 p.m., and tickets are \$8 for a couple. Times for viewing on Saturday are

from 10 a.m. to 10 p.m., and on Sunday, from 10 a.m. to 6 p.m. An admission charge will be made of \$1 for adults, 50 cents for students and children. Call 489-6796 if any further information is required.

THE SANDIN LECTURE SERIES

The Reuben Benjamin Sandin Lecture Series, sponsored by the Department of Chemistry, will be given this year on May 10, 11, 12, and 13. The 1971 lecturer will be KAREL WIESNER, FRS, Professor of Chemistry at the University of New Brunswick in Fredericton.

Professor Wiesner is one of the world's leading authorities on natural products chemistry. Born in Prague, Czechoslovakia, in 1919, he studied chemical engineering at the Prague Institute of Technology and at the Charles University in Prague, receiving his doctorate in 1945. In 1948 he came to this country, where at the University of New Brunswick he has built Canada's leading school of natural products chemistry. Professor Wiesner was elected to the Royal Society of Canada in 1957 and in 1969 became a fellow of the Royal Society of London.

This is the tenth of an annual lecture series to commemorate over 40 years of service rendered to The University of Alberta by Professor Reuben B. Sandin.

CONCERT CANCELLED

The last in The University of Alberta String Quartet's series of concerts in the Provincial Museum and Archives, scheduled for Friday, April 16 at 8 p.m., has been cancelled.

GIRLS' FASTBALL

Would girls interested in playing second division fastball this summer please contact MRS. CAROL BATOR, at 476-8024 during the day, or MRS. LYNDA RISKE at 475-2338 either day or evening.

EXTENSION COURSES

A Seminar on Real Estate Finance will be held April 25 through 28 at the Banff School of Fine Arts, the registration deadline for which is April 16. The seminar will be of interest to real estate personnel, property developers, public and private investors, lenders, and construction personnel.

Among the topics to be discussed are real estate financing in Canada, sources of information for financial decision-making, methods of analyzing participating mortgages, and changes in economic conditions and legislation affecting lending activity in Alberta.

The fee will be \$150, which includes tuition, supplies, accommodation, and meals. Further information is available from the Department of Extension, Corbett Hall, 82 Avenue and 112 Street, telephone 439-2021, extension 30.

PERSONAL NOTICES

Notices must reach the Editor by 9 a.m. the Friday prior to publication and should not exceed 35 words. They will appear for two consecutive weeks.

Accommodation available

FOR SALE—Three-bedroom split-level home in Riverbend, two years old, 2,000 sq. ft. Family room with fireplace, den, 2½ baths, utility room, broadloom, stove, large lot, 8¾ per cent mortgage. Offers 434-4009 evenings.

FOR RENT—Newer three-bedroom home in Malmo, attached garage, 1½ baths, appliances, landscaped, on U-2 busline, 15 month lease, May, 1971. 434-4025.

FOR RENT—House in S.E. London, England; fully-furnished, modernized (Swedish space heater), three bedrooms, large family diningroom livingroom, garden with trees. Available July 15, 1971, to August, 1972, or longer. \$225 per month. 432-4006 or 469-2033.

FOR SALE—Bi-level four-bedroom home in Lendrum, two bathrooms, L-shaped living-dining area. Recreation room, laundry-workshop, double garage, dog run, fenced and landscaped lot, patio. No agents please. 435-1088.

FOR RENT—Three-bedroom split-level (2 yrs. old) in Patricia Heights. Near University. Partially furnished if desired. Available June 1, 1971. One or two year lease required. \$275 per month. 432-4938 days, 484-6876 evenings.

ROOM FOR RENT—Board optional, reasonable. For female in west end home. Sharing with mother and two school-aged children. All conveniences. Available May 1. Ride provided to campus daily. 484-7629 evenings.

FOR RENT—One-bedroom apartment (furnished) near campus May-August. Rent negotiable. 433-5705.

FOR RENT—Furnished three-bedroom bungalow in Greenfield. From July 1, 1971, to July 31, 1972. Garage, landscaped and fenced, fireplace. Lease required. Rent negotiable. 434-4939.

FOR RENT—Furnished room for female non-smoker, with young couple in a quiet house close to campus in Windsor Park; linen and laundry supplied, room and breakfast or full board, available May 1. 433-0639.

FOR RENT—Deluxe three-bedroom furnished house on Saskatchewan Drive. 5 minutes walk to University. All modern appliances, bedding and dishes included. June-July-August. 433-7285.

FOR RENT—Four-bedroom furnished home with study and family room on Aspen Drive West backing on Whitemud ravine; all appliances, double garage. August 1, 1971, to August 1 or 31, 1972. 434-5719 (home) or 432-3357.

IF YOU ARE A GIRL interested in sharing a one-bedroom suite with another girl after April 1, five blocks from the University, phone 432-6202 days, 469-0606 evenings.

FOR RENT—Completely furnished one-bedroom studio apartment with TV, 15 minute walk from University. Lease from May 1 to September 1, 1971. 432-4142 or 433-5632.

FOR SALE—Cosy two-bedroom home, close to McKernan School, bus, shopping, and University. Two extra rooms in basement. Garage, garden, and nice fenced yard at back. 699-9017 or 439-3865.

FOR RENT—Three-bedroom semi-bungalow, furnished, on acreage near Sherwood Park. Available early May to August 30, 1972. Rent negotiable. 699-7442 or 432-4438.

FOR RENT DURING SUMMER SESSION—Five-bedroom bungalow, Belgravia, ten minutes walk from campus; all conveniences, garage, garden. 433-4132 or 432-5402.

FOR RENT—Four-bedroom split-entry, bilevel home in St. Albert. Year old, furnished, appliances,

two baths, driving pad, panoramic view, close to school. June 1, 1971 to August 31, 1972. Lease required, rent negotiable. 559-3429 or 432-3395.

Accommodation wanted

WANTED TO SUBLET—Apartment for May and June.

Call Anna 3978, 3979, or 3873 (ask for room 345). WANTED—Room with cooking facilities, vicinity 116 Street and 91 Avenue. Call Anna 3978, 3979, or 3873 (ask for room 345).

WANTED TO RENT—Unfurnished or semi-furnished house near University or central from May 1 to July 31, 1971, for approximately \$140. 4052 (Daena) days or 433-4691 evenings.

WE NEED A GIRL to share our apartment in Garneau Towers. Rent \$55. Room to yourself. Available May 1. 433-4325.

WANTED TO RENT—Visiting professor with family wishes to rent cottage near lake for two weeks in July. Phone Fred Martin, 433-2077 after 6 p.m.

WANTED TO RENT—Married couple, no children, want to rent three-bedroom house. Long term lease. Large master bedroom, separate dining room, and stove required. Occupancy May 1. Prefer close to University. 479-3587 afternoons and evenings.

WANTED TO RENT—Three- or four-bedroom house on southside, for one or two years. Responsible family, references. Wanted April or May, 1971. 439-7447.

WANTED TO RENT—Young married couple desire accommodation from May 1 to August 1, 1971. Preferably furnished and reasonably priced. 477-2916 evenings.

WANTED TO RENT—Visiting professor wants to rent a four-bedroom furnished house in September, 1971, to July 1, 1972. 432-5683 or 435-1339.

WANTED TO RENT—Two- or three-bedroom unfurnished suite or house near University. From July 1, 1971. 432-5843 days, 433-9641 evenings.

Automobiles and accessories

FOR SALE—1961 Pontiac, automatic, radio, new generator, new starter, battery, etc., good condition. Must sell, leaving country. 432-3517 days, and 454-6922 evenings.

FOR SALE—Austin 1100 mk. II, 16,000 miles, engine and body in immaculate condition, radio, block and interior heater. \$1,275. Brian Robinson 432-5658, 433-9984.

FOR SALE—1963 Chevy II, standard, two-door. Good condition. Must sell, leaving country. 432-5159, or 488-9256 between 5 and 7 p.m.

FOR SALE—1967 Ford Ranchwagon. Excellent condition. Must sell or no PhD; typist threatening to strike. 599-7470.

FOR SALE—1970 Datsun 510, automatic, 13,000 miles. 439-4991 ext. 43 9 to 5 p.m.

FOR SALE—1970 350 Suzuki, excellent condition—under 5,000 miles. Also one year old 650 BSA, excellent condition—6,500 miles. 433-9833 or 433-1027.

FOR SALE—1969 Buick Skylark, two-door hard-top, metallic brown, white vinyl roof. Like new, only 17,000 miles. Radio, power steering, brakes. Cost \$4,750 new. Leaving country, will sell for \$2,700 or best offer. 434-2044.
